

TACTILE SYSTEMS TECHNOLOGY: VISION, MISSION, VALUES

Our Vision

- To advance the standard of care in treating edema and vascular diseases

Our Mission

- Establish the Flexitouch system as the standard of care in treating lymphedema in the United States to improve the health, quality of life and reduce the overall cost of treating lymphedema
- Extend the Flexitouch system technology to other geographic markets and other edema and vascular conditions
- Identify complementary solutions in edema and vascular markets

Our Goals

- Become an expert resource in edema and vascular disease
- Expand awareness of lymphedema
- Provide innovative solutions for vascular problems

Our Values

- Maintain our patient focus
- Manage our relationships with employees, vendors, customers and stakeholders with respect, honesty and integrity
- Be quality driven
- Help caregivers provide quality care
- Offer a fun and fulfilling workplace
- Earn significant returns for our shareholders
