

A better way to enjoy lymphedema relief.

In the comfort of your home.

ENTRE® PLUS
PNEUMATIC COMPRESSION SYSTEM

Tactile
MEDICAL®

The Entre Plus system.

If you've been diagnosed with lymphedema or chronic venous insufficiency, you know the pain and discomfort it can bring. The Entre Plus pneumatic compression system is an at-home 60-minute daily therapy designed to provide relief to your affected legs or arms so you can get on with your day. And with regular use, you may be able to reduce your trips to the doctor or lymphedema therapist.

How pneumatic compression works.

While diet, exercise, and elevation can relieve some symptoms, it often isn't enough. Using a system like Entre Plus can provide greater swelling relief by applying a gentle squeezing action that directs lymphatic fluid away from the affected area toward healthy, functioning regions of the body where it can be naturally absorbed and eliminated.

EXPERIENCE THE ENTRE PLUS DIFFERENCE

The Entre Plus system includes a new and improved controller unit and garments that come in a variety of sizes to treat swelling of the arms or legs (leg garment shown). It features:

- 1** Eight compression chambers and multiple pressure modes deliver targeted treatment.
- 2** Improved active deflation helps you remove garments easier.
- 3** Two ports let you treat both arms or both legs at once.
- 4** Easy-to-use controller unit with a countdown clock to let you know how much treatment time remains.

Helping you get the most out of your at-home treatment.

Entre Plus garments have multiple fit options and pressure settings so you can customize your therapy experience and comfortably treat up to two affected limbs at once.

“

The Entre system works! I had been dealing with lymphedema for about one year and was prescribed the Entre system to help manage my swelling. I noticed immediate relief after using the system for the very first time, and have since made a point to use it every day — even when I travel.
